

1. Introduction

Peraldex® - AMS is a biological product to defeat lower sporogenous plants like algae, moss and mold on different undergrounds, for example stones, concrete, bricks, frontages and rendering. It kills off molds and neutralises bad odors.

Peraldex® - AMS is secure, harmless for human beings, animals and environment, has no toxic properties and is not caustic. Furthermore metal is unaffected by Peraldex® -AMS.

Peraldex® - AMS is easy to use, readily biodegradable and environment friendly.

2. Application

Apply a thick film of **Peraldex® - AMS** on the infested surface with a paintbrush, scrubber or a atomizer. If necessary remove wallpapers and other looser underground before application.

After a application time of about 4 to 5 days, the infestation should disappear. Just in case of very strong infestation a brush off or a swill down is necessary.

Multiply the application in case of very strong infestation.

Do not use **Peraldex® - AMS** in a period of wet weather, because this can reduce the cleaning effect.

It is recommendable to applicate **Peraldex® - AMS** when the temperature is more than 10 °C, because this raises the activity of the product.

3. Toxicology

The in **Peraldex® - AMS** contained microorganisms belong to risk group I in compliance BioStoffV 2000/54/EG. They are harmless for human beings, animals and the environment.

4. Safety precautions

Wash hands and exposed skin before eating, drinking or smoking and after work.

Keep it far from children.

Read the Material Safety Data Sheet.

5. Transport information / storage information

Transport:

No special demand.

storage:

Keep it far from children and unauthorised persons.

Do not store it together with food, pharmaceutical or fodder.

The Formulation is stable for about one year at 20°C, if not opened.
Store it dark and cool.

In combination with chemical substances the stability is not proved and no guarantee is given.

6. Waste disposal

Do not use empty packaging again.
Dispose of empty and swilled packaging in compliance with administrative regulations.

7. Disclaimer

The uses as discibed have not necessarily been approved by any regulatory authority. This Technical Information sheet in no way constitutes a recommendation to apply **Peraldex® - AMS** for unregistered uses.
